

Medication lubricant

Making tablets easier to swallow

The **FIRST** and
ONLY medication
lubricant available
in Australia

evomed
innovative healthcare products

What do you currently use to administer medications?

Yoghurt

Fruit Puree

Orange
Juice

Jam

Custard

Chocolate
Pudding

Thickened
Fluids

Ice Cream

None of these substances have been designed for use with medications and may impact the efficacy, side-effect profile and absorption of the drug

Crushing or splitting medications can result in:

Increased risk
of side-effects

Decreased
therapeutic effect

Loss of
dose

Delayed oesophageal transit of medication may result in ulceration¹

Medication induced ulcer

Medication induced ulcer

Medication induced ulcer

Accumulated crushed medication

medication lubricant

Gloup[®] can assist in 3 ways:

1. Oral

- makes medication easier to swallow
- reduces the need to crush medication
- masks the bitter taste of medication

2. Oesophagus

- reduces friction between the medication and oesophagus lining
- facilitates smooth oesophageal transit
- reduces the risk of medication getting stuck

3. Stomach

- designed to break down immediately once in the stomach, therefore having minimal or no impact on absorption

Gloup® is a slippery gel that makes whole or crushed tablets EASIER TO SWALLOW

Why should you use Gloup® ?

- Slippery gel that makes tablets easier to swallow and **may negate the need to crush**
- **No known drug interactions**
- Designed to break down immediately once in the stomach, therefore having minimal or **no impact on absorption**

Clinical feedback

- Gloup® improved medication compliance ²
- 90% of healthcare workers agree that Gloup® is an effective method to facilitate pill-swallowing ²
- Gloup® reduced the need to crush pills ²

Available in 4 flavours and 2 thickness levels

Which Gloup® is right for your patient?

Product	Flavour	Level	Patient group
Gloup® Low Sugar	Raspberry	3 Moderately thick	Those on a low-sugar diet
Gloup® Original	Orange, Strawberry/Banana	3 Moderately thick	Appropriate for most patients
Gloup® Forte	Vanilla	4 Extremely thick	Severe dysphagia*

The Australian *Don't Rush to Crush Handbook* by SHPA states...
"for some people, use of a medication lubricant can avoid the need to crush or disperse medicine" ³

First use of Gloup®

When using Gloup® for the first time, it is recommended to give a spoonful of Gloup® without a tablet

How to use Gloup® with **whole** tablets

1. Place tablets on a spoon

2. Add approximately 5 mL of Gloup® ensuring tablets are well covered

3. Take medication

4. Depending on your condition, you may or may not swallow water after using Gloup®

How to use Gloup® with **crushed** medications

1. Pour a layer of Gloup® into a medicine cup

2. Pour the crushed medication over Gloup®

3. Cover with another layer of Gloup®
Do not stir

4. Scoop with a spoon and take medication

Gloup® should encapsulate the crushed medication, which reduces the bitter taste of the medication

Key features of Gloup®

- Suitable from the age of **2+**
- **60-day shelf-life** once opened; **2-year shelf-life** unopened
- Can be stored at **room temperature** or **refrigerated**
