

**Biatain**<sup>®</sup>  
Silicone

Enjoy the freedom of  
superior absorption

New and  
improved

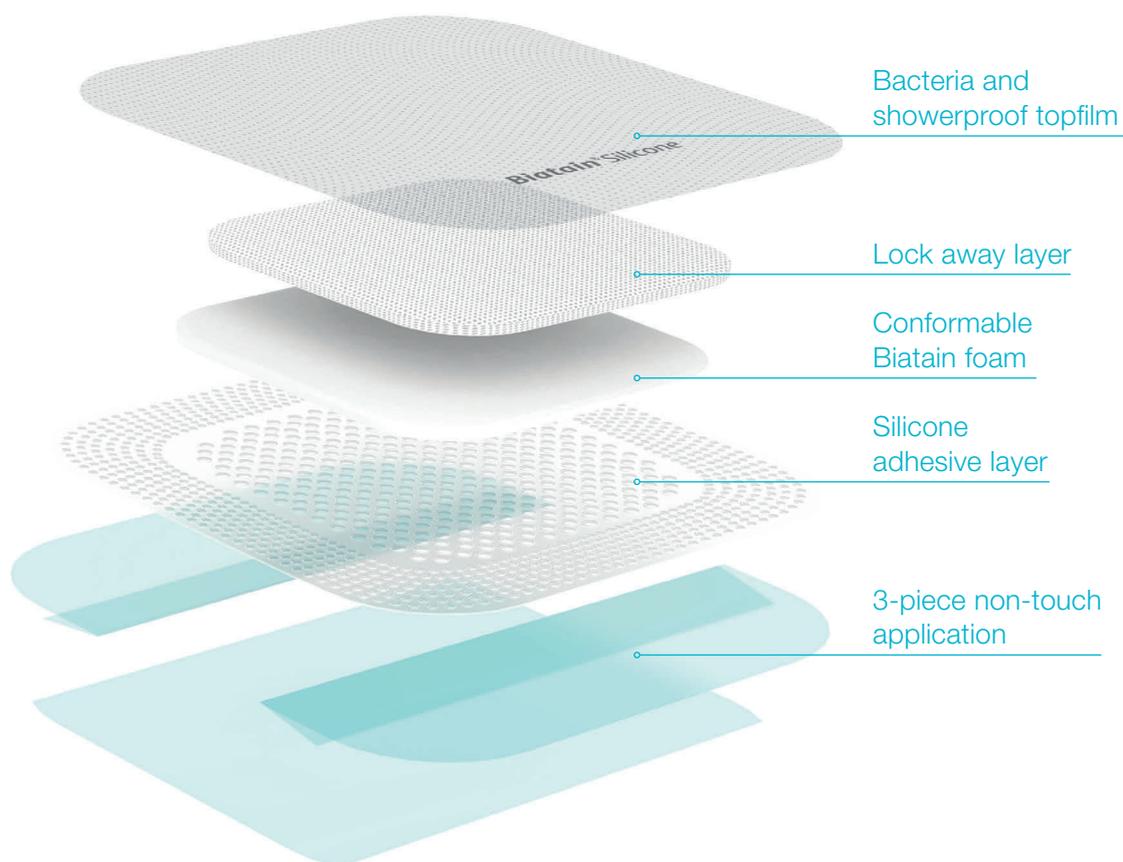

# Superior absorption

As all Biatain® dressings, the new Biatain Silicone has superior absorption – the key to faster healing

## Poor exudate management can lead to

- Maceration
- Excoriation
- Leakage
- Increased dressing changes

The new Biatain Silicone excels by providing superior absorption<sup>1</sup> and an optimal moist wound healing environment.

The new Biatain Silicone has a layered construction that locks in exudate and delivers superior absorption.

## Biatain's unique 3D polymer foam

- Conforms to the wound bed
- Absorbs exudate vertically
- Locks away fluid even under pressure

3. Adderly UJ. British Journal of Community Nursing 2010;15(3):15-20

# Secure fit

The new Biatain® Silicone delivers a secure fit for high patient comfort without compromising superior absorption

We are introducing a new design of Biatain Silicone which includes:

- Easy and aseptic application due to 3-piece non-touch opening
- A perforated soft silicone adhesive wound contact layer, ensures a secure fit to keep the dressing in place.
- Conformable Biatain foam pad layer
- Lock away layer to enhance absorption capacity and retention of exudate
- New highly permeable, bacteria and showerproof topfilm for better fluid handling
- High patient comfort delivered through bevelled edges, soft and flexible materials and foam pad at skin level

# Fewer dressing changes

The new Biatain® Silicone delivers superior absorption, conformability and a secure fit

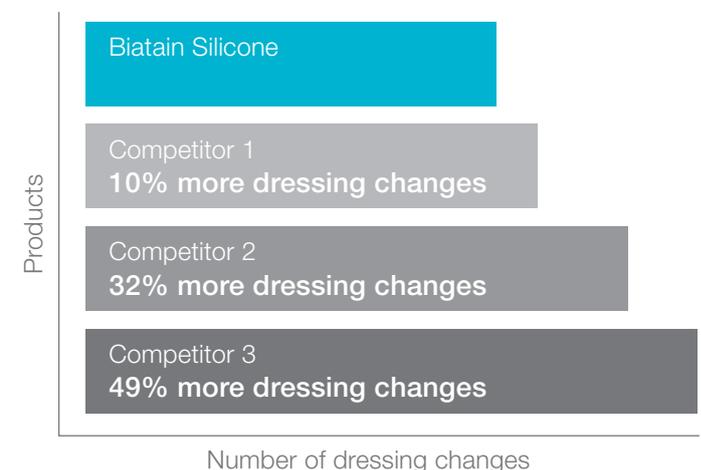

## Up to 49% reduction in dressing changes<sup>1,2</sup>

Patients and HCPs using the new Biatain Silicone can experience up to 49% reduction in dressing changes due to the superior absorption of Biatain Silicone.

## Fewer dressing changes support faster healing

Every time a wound dressing is changed, the wound will be disturbed, which can delay the healing process<sup>3</sup>. Due to fewer dressing changes, the new Biatain Silicone enhances the wound healing process and delivers faster healing to your patients.

## Average weekly number of dressing changes<sup>1,2</sup>

# Biatain® sizes and shapes

Superior absorption for non-infected wounds\*

## Biatain Silicone

Item no.	Size cm
13286	7.5x7.5
13287	10x10
13288	12.5x12.5
13289	15x15
13290	17.5x17.5

## Biatain Silicone Lite

Item no.	Size cm
33444	7.5x7.5
33445	10x10
33446	12.5x12.5

New Biatain packaging (makes it easier on the shelf)

Available in New Zealand through **USL Medical**
