 Continence  
Management

MoliCare<sup>®</sup>  
Premium Elastic

Better care  
made easy

# MoliCare<sup>®</sup> Premium Elastic

Better care made easy

# Comfort & Security\*

## For moderate to severe cases of incontinence

- Suits all body shapes thanks to its elasticated side panels
- Less handling during product change preserves the patient's dignity
- Prevents skin irritation in the folds of the skin

**COMFORTABLE  
& EASY USE**

### Comfortable to wear

Ensures a better adaptation to the body's shape and movements

### Comfortable to wear

Thanks to the elasticated side panels and the re-closable tapes MoliCare® Premium Elastic suits and adapts to all body shapes and movements.

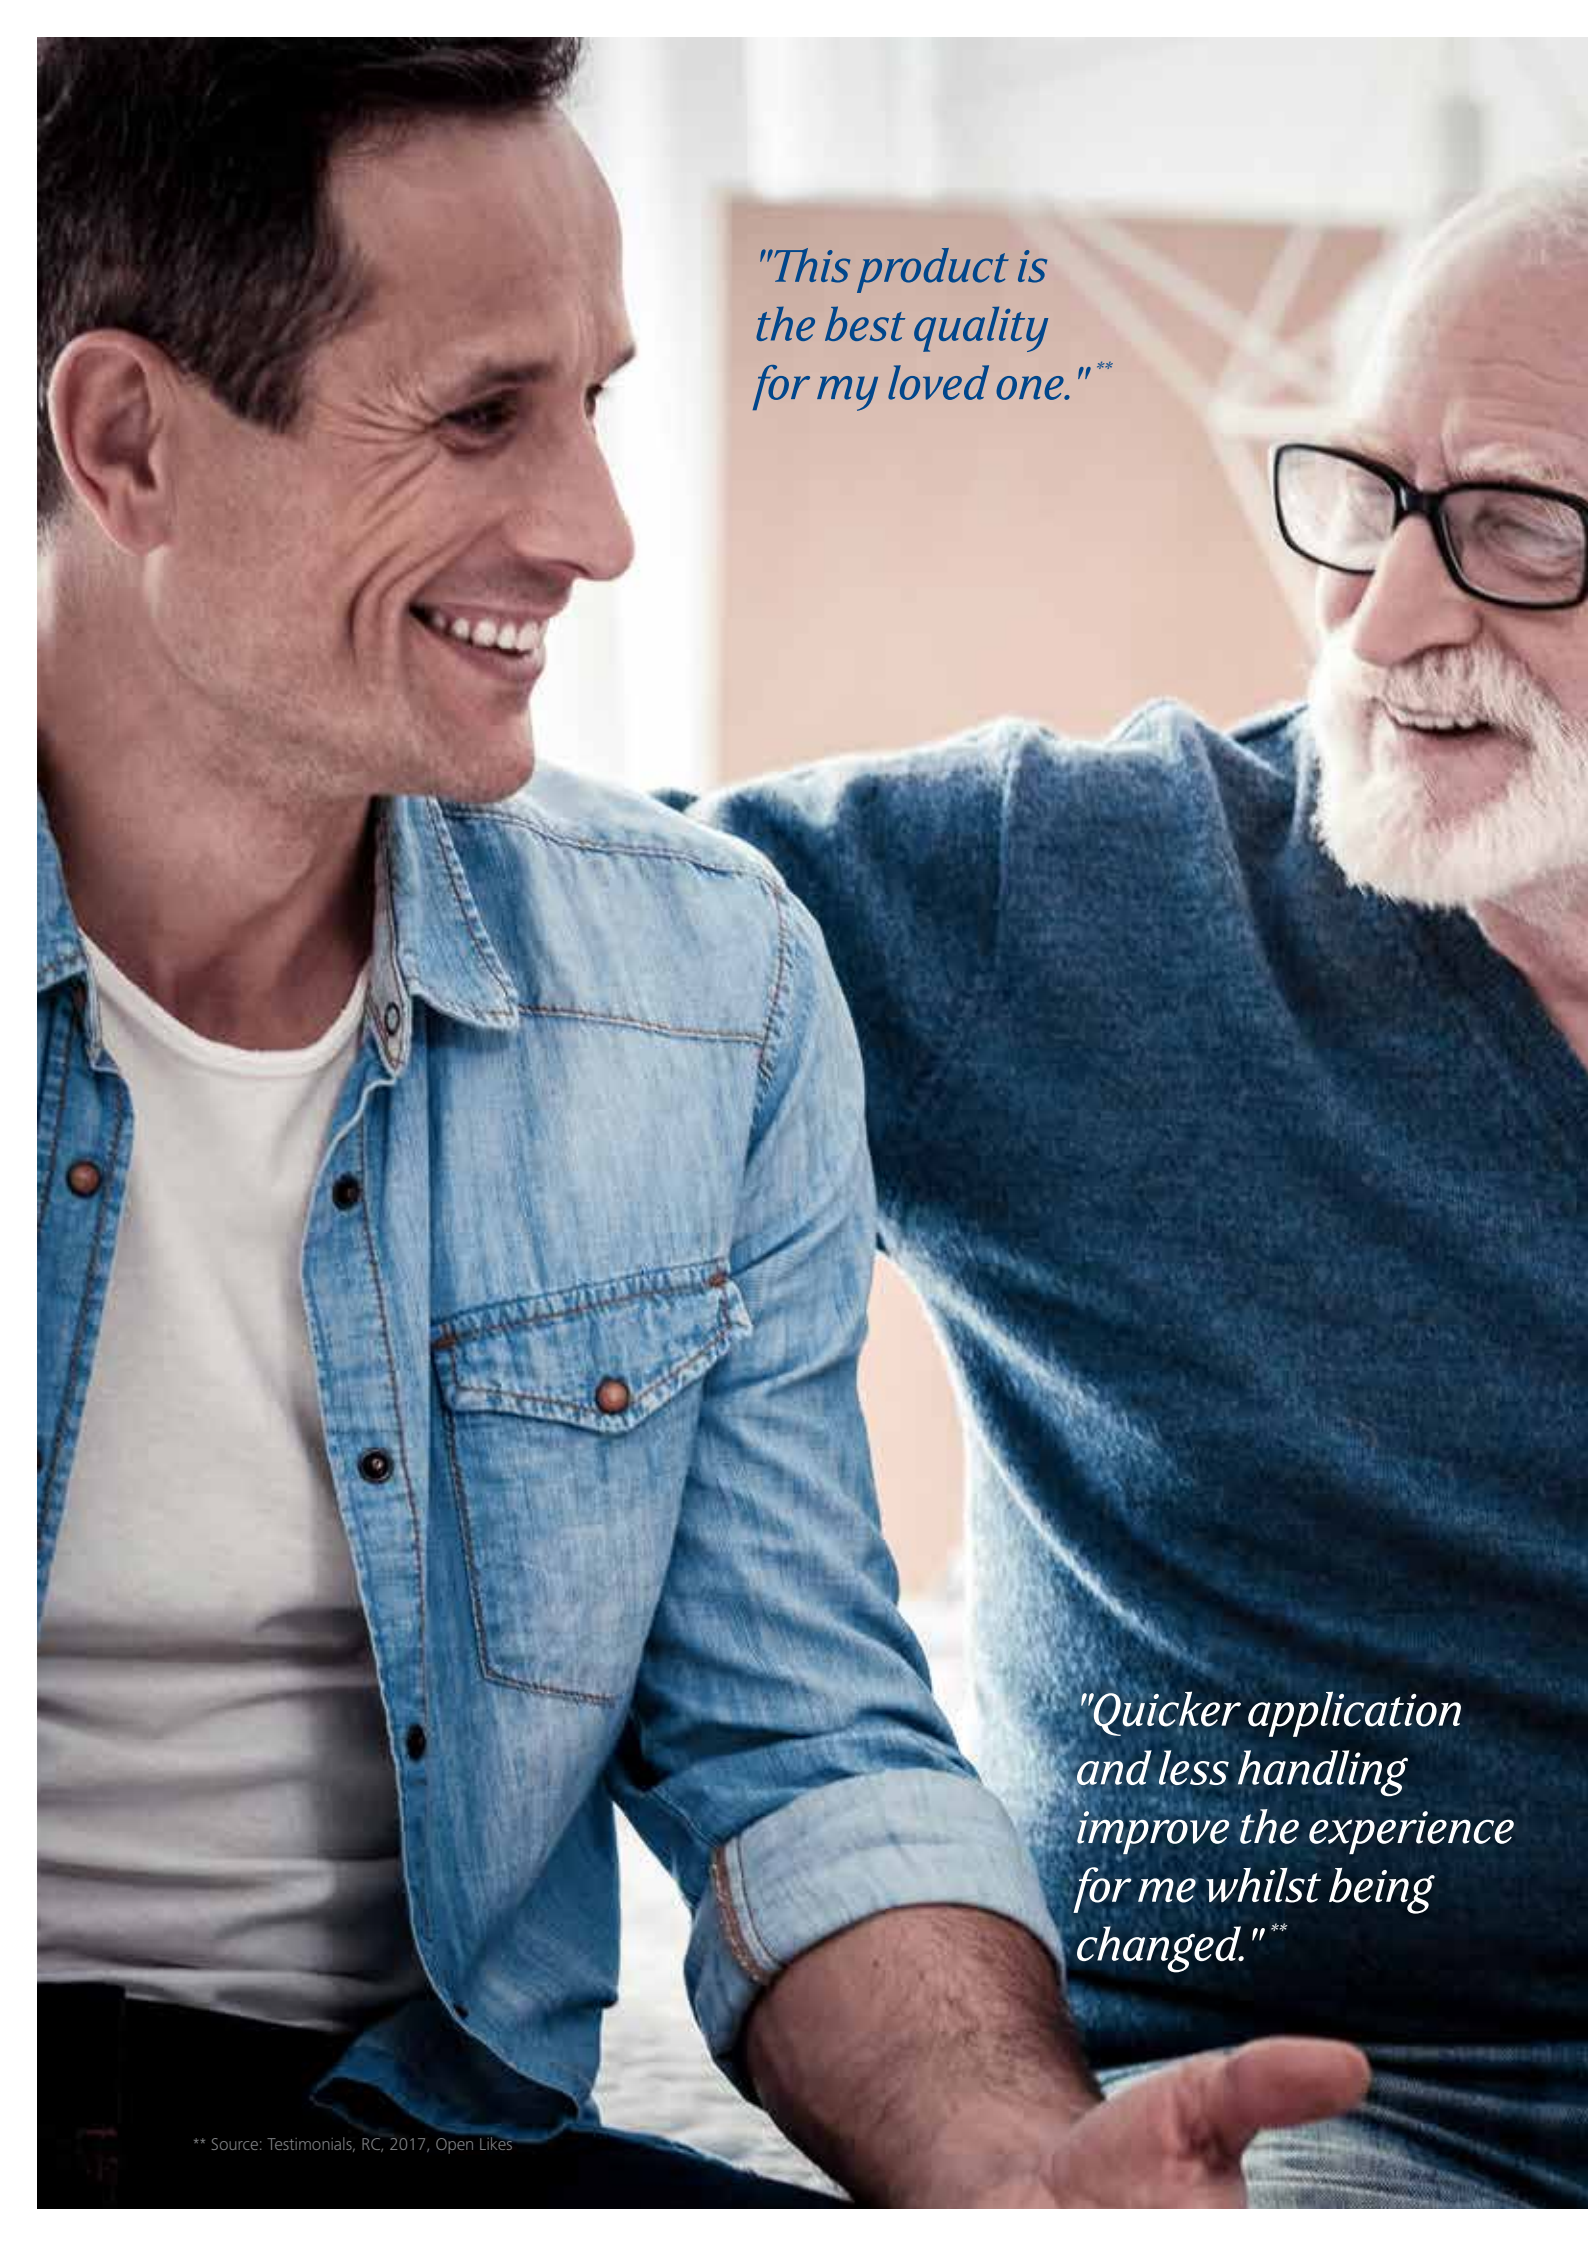

### Self-explanatory and secure application

2 side panels and 2 re-closable tapes for easy handling and perfect closing results. Application in only 4 steps instead of 8<sup>(1)</sup>.

\*Leak-proof security

A photograph of a man and an older man sitting together and smiling. The man on the left is wearing a light blue denim shirt over a white t-shirt. The older man on the right has a white beard and is wearing glasses and a dark blue sweater. They are both looking towards the right side of the frame.

*"This product is  
the best quality  
for my loved one." \*\**

*"Quicker application  
and less handling  
improve the experience  
for me whilst being  
changed." \*\**

*"I love the comfortable fit  
of this product. It is soft and  
I feel secure." \*\**

# Ergonomically Superior<sup>(2)</sup>

## Faster application and an improved working environment

- Self-explanatory and intuitive
- Easy use, product application in 4 steps instead of 8<sup>(1)</sup>
- Faster and easier application combined with ergonomic handling for caregivers reduces body stress

## What about Repetitive Strain Injury (RSI) ?

Together with other factors, the application  
of continence products may lead to RSI  
due to repeated movements and overuse of joints.

For further information  
please refer to  
our RSI sheet.

approximately  
**-24%**<sup>(2)</sup>  
physical stress using  
MoliCare® Premium Elastic

*"During training sessions with customers, we observed that staff were able to understand better the application of MoliCare® Premium Elastic when compared to a traditional slip. It has really helped us to optimize our training approach."*

Nurse Advisor, France

## A new design with faster application.<sup>(1)</sup>

- MoliCare® Premium Elastic delivers a better care regime for patients and carers
- Faster and easier application improves dignity for patients
- Products are intuitive for carers to use and deliver improved patient comfort and fit
- Approximately 20% time saving in application enables more efficient care<sup>(2)</sup>
- Circa 24% less physical stress using MoliCare® Premium Elastic ensures a better working environment<sup>(2)</sup>

*"Thanks to its elasticated side panels this new product can be applied very quickly."*

Caregiver, France

A woman with dark hair tied back, wearing black-rimmed glasses and a white lab coat, is looking down at a tablet computer held in her hands. The background is a soft-focus indoor setting with light coming from a window.

*"I really pay attention to all that can reduce workload. Fast and easy to apply, MoliCare® Premium Elastic meets caregivers' expectations to optimize the time spent with the patients."*

Purchasing & Logistics Dpt, France

Delivers comfort, security and dignity for patients

- Easier handling and perfect closing can help to improve the working environment for carers
- Supports the delivery of high standard customer service in institutions

**Better care made easy for patients, caregivers and institutions.**

# MoliCare<sup>®</sup> Premium Elastic

Better care made easy

## Ergonomic use

Approximately 20% faster application as well as easier and more ergonomic handling for caregivers<sup>(1)</sup>.

**COMFORTABLE  
& EASY USE**

## Re-closable tapes

2 re-closable tapes (one for each side) for easy handling and perfect closing results.

## Adjusted fit & Elasticated side panels

Elasticated side panels in the hip area ensure better adaptation to the body's shape and movement, delivering improved comfort for the patient.

## Anti-leakage system

Ensures greater leakage protection for more security.

## Odour neutraliser

Neutralises unpleasant odours, for enhanced well-being.

## 3-layer absorbent core

Keeps skin dry with a 3-layer absorbent core and advanced dry technology.

## Quick dry system

Fast dry effect thanks to 3-layer absorbent core.

## Active skin protection

Skin-friendly, pH 5.5 ensures maximum skin compatibility.

## Hypoallergenic and dermatologically tested

The materials used have an extremely low potential to trigger allergic reactions.

## What about skin integrity ?

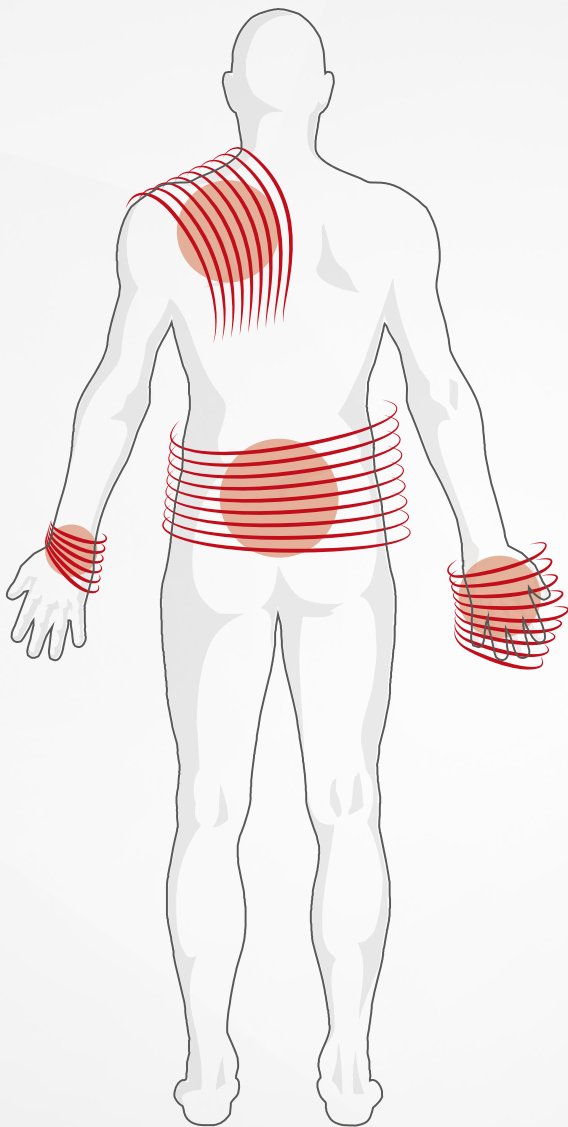

An unique dual system  
for active skin protection :

The combination of MoliCare® Premium Elastic  
and MoliCare® Skin is the appropriate solution  
to preserve patient's skin health.

# What about Repetitive Strain Injury ?

Among other reasons, the application of incontinence products may cause RSI due to repetitive movements and overuse of joints.

## What is RSI?

Repetitive Strain Injury is a general term used to describe the pain felt in muscles, nerves and tendons caused by repetitive movements and overuse of forearms and elbows, wrists and hands, neck and shoulders.

It's also known as work-related upper limb disorder or non-specific upper limb pain.

## What causes RSI?

RSI is related to the overuse of muscles and tendons in the upper body.

Certain things are thought to increase the risk of RSI, including: **repetitive activities**, doing a high-intensity activity for a long time without rest, **poor posture or activities that require you to work in an awkward position**.

It's important to work in a comfortable environment which has been appropriately adjusted. Employers have a strong interest in reducing and preventing work related RSI.

Regular and repeated application of all-in-one slips can require caregivers to take an awkward posture, that in some cases could lead to Repetitive Strain Injuries.

physical stress using  
MoliCare® Premium Elastic

# MoliCare® Premium Elastic

For an easier and faster application.

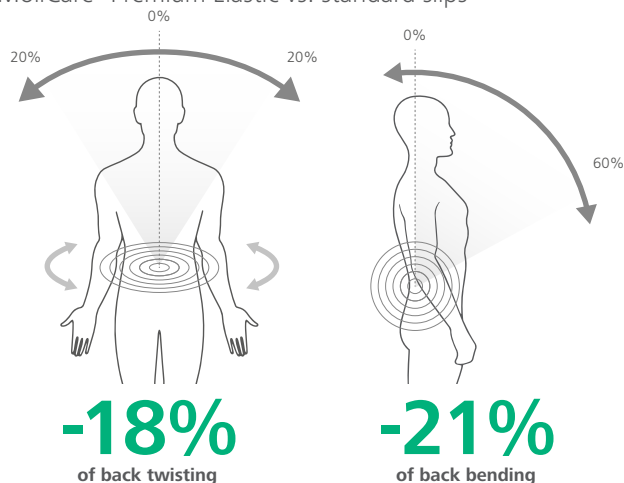

MoliCare® Premium Elastic offers clinically proven ergonomics. The innovative features allow for easier and faster application, helping to reduce the care personnel's physical stress. A study conducted at the Dijon University Hospital Centre (France, October 2015) demonstrated the ergonomic advantages of MoliCare Premium Elastic when compared with a standard incontinence slip.

The study was conducted by the independent organization « die Ergonomie Experten » of Friedrichshafen, Germany. The measurement methods used were the SonoSens and RULA (rapid upper limb assessment) methods.

## Study results, the evidence

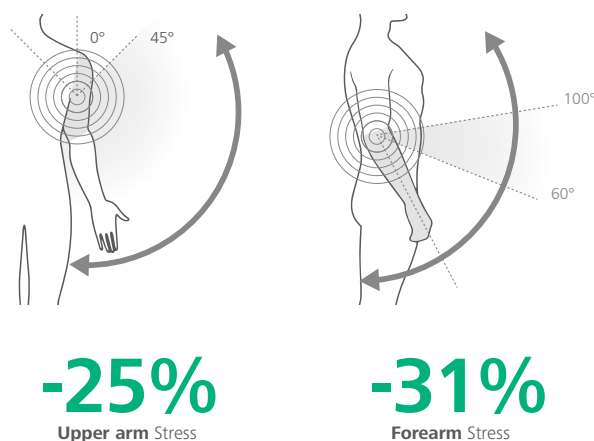

### 1 Back position

MoliCare® Premium Elastic vs. standard slips

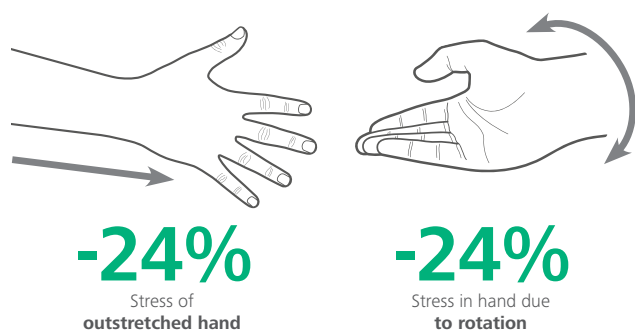

### 2 Arm Stress

MoliCare® Premium Elastic vs. standard slips

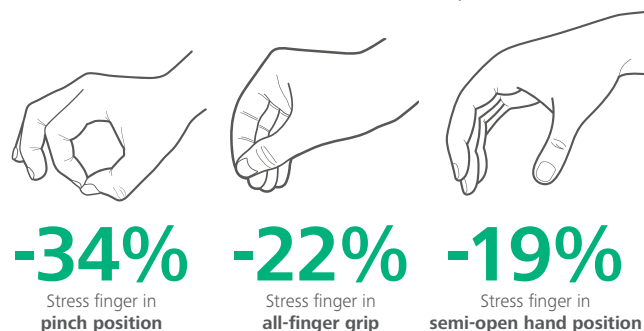

### 3 Hand Stress

MoliCare® Premium Elastic vs. standard slips

### 4 Finger Stress

MoliCare® Premium Elastic vs. standard slips

(1) Laboratory report about ergonomic evaluation of MoliCare® variants A+B incontinence products. Research conducted between 5-8 October 2015 in Dijon, France. W. Schneider, H. Mutschler, R. Haller, C. le Mathe. Comparison with a slip having 4 side panels and 4 tapes.

approximately  
**-20%** <sup>(1)</sup>

**less time needed for application with MoliCare® Premium Elastic**  
due to fewer application steps (4 instead of 8) combined with less awkward postures for muscles and joints.

# MoliCare® Premium Slip & Elastic

## Product equivalence list

### MoliCare® Premium Slip

All-in-one incontinence slip  
**with 4 breathable side panels  
and 4 re-closable hook  
& loop tapes** for moderate to severe  
urinary and faecal incontinence

### MoliCare® Premium Elastic

All-in-one incontinence slip  
**with 2 elasticated side panels  
and 2 re-closable hook & loop tapes**  
for moderate to severe urinary  
and faecal incontinence

(1) The reduction from 4 to 2 tapes (one for each side) combined with no side panels in the front, simplifies the application, by reducing the application steps from 8 to 4 compared to a traditional slip with 4 side panels and 4 tapes. Additionally, due to the elasticated side panels, there is less adjustment needed. (2) Laboratory report about ergonomic evaluation of MoliCare® variants A+B incontinence products. Research conducted between 5-8 October 2015 in Dijon, France. W. Schneider, H. Mutschler, R. Haller, C. le Mathe. Comparison with a slip having 4 side panels and 4 tapes.
