

The **Rocket[®] Seldinger Chest Drainage Set** is indicated for the percutaneous insertion of a pleural drain for fluid and air and is particularly suitable for: ¹

- Pneumothorax, spontaneous or iatrogenic
- Effusions, benign or malignant, except those with high protein content.
- Low viscosity empyema

The **Rocket[®] Seldinger Chest Drainage Set** features:

- Improved patient comfort using small bore catheterisation ^{2,3}
- Reliable insertion via Seldinger approach under direct vision, x-ray screening or ultrasound guidance
- 10cm dilators with safety stops to minimise the risks of over-insertion associated with the traditional 20cm dilator.
- Drapes and a gown are included in all PK coded packs in response to NPSA/2008/RRR3
