

**Aerosolized Medication
Device for Infants. An
alternative to aerosol "blow-by"**

The PediNeb™ was designed to enhance the delivery of aerosolized medication, while reducing the apprehension encountered by young patients.

PediNeb™ features and benefits:

- Pacifier. Calms the infant/toddler during aerosol treatment. Medication is inhaled through the nose, not the mouth.
- Medication Port. Directs aerosolized medication to the nose and eliminates medication waste associated with the "blow-by" technique.
- VixOne small volume nebulizer. Clinically proven, providing superior medication delivery performance.
- Easy to operate, clean and efficient.
- Developed by a pediatric nurse practitioner.
- Latex free.

***The PediNeb™, a new
modality in aerosolized
medication delivery.***

Westmed

High Output Nebulizer
which delivers medication
quickly and efficiently

A recent study compared the performance of 17 nebulizers regarding dead volume, time, MMAD, percent of aerosol mass in the respirable range, etc. The VixOne performed among the most efficient in each of the categories, and most importantly provided the largest respirable mass of aerosol available to the patient. — Chest, August 1996

Ideal particle size production (MMAD=2.7 μ) allowing high lung deposition which results in maximum therapeutic effect.*

VixOne™ features and benefits:

- Anti-spill “Tee” design
- Leak-proof and secure seal with simple 1/4 turn assembly design
- Very low dead volume (0.7cc)
- High medication bowl capacity (10cc)
- Graduated volume (cc) markings on bowl
- Nebulizes in upright positions or at angles up to 45°
- Latex Free
