Eye contact:	Irrigate thoroughly with water for at least 15 minutes. If persistent irritation occurs, obtain medical attention.
Skin contact:	Avoid prolonged contact. Wash thoroughly with water, using soap if available. If persistent irritation occurs, obtain medical attention.
Inhalation:	Remove to fresh air. If rapid recovery does not occur, obtain medical attention.
Ingestion:	Do not induce vomiting. Wash out mouth thoroughly with water and give plenty of water to drink. Quantities of 150ml or more should be considered as potentially lethal and IMMEDIATE medical attention sought.

4.2 Most important symptoms and effects, both acute and delayed

Eye contact:	Irritating to eyes
Skin contact:	There may be mild irritation at the point of contact.
Inhalation:	Narcotic at high vapour concentrations.
Ingestion:	Irritation of the throat and digestive tract. Narcotic effect.

SECTION 5: FIRE FIGHTING MEASURES

5.1 Extinguishing Media

Alcohol resistant foam, water spray or fog. Carbon dioxide, dry powder, sand or earth may be used for small fires only. Water in a jet unsuitable.

5.2 Special hazards arising from the substance or mixture

Hazardous combustion products may include carbon monoxide. The vapour is heavier than air, spreads along the ground and distant ignition is possible.
